# Geometric aspects on capillary problems and related topics

## December 14-17, 2015   Granada, Spain

### Invited Speakers

**Jaigyoung Choe**   Korean Institute of Advanced Studies
**Ailana Fraser**   University of British Columbia
**Miyuki Koiso**   Kyushu University
**Bennett Palmer**   Idaho State University
**Rabah Souam**   IMJ-PRG, Université Paris 7

### A workshop organized by

**Rafael López**   University of Granada
**Juncheol Pyo**   Pusan National University

---

The meeting will cover various topics of the theory of CMC/minimal surfaces and capillarity, free boundary problems or other condition on the boundary of the surface. This includes surfaces in different ambient spaces or surfaces with other type of prescribed mean curvature (sessile/pendant drops, translating solitons, rotating drops)
